

Hi friends! I have a super fun and easy sewing project for you! Today I'm sharing how to make the Squishy Project Bag. It's great for storing craft projects, knitting, embroidery, school supplies, and anything else you can dream up!

This bag is so easy and definitely beginner friendly. It should only take about an hour and a half or so to put together.

Materials and Cutting Instructions:

Outside of bag: *(Note: You can create a custom outside fabric using scraps as long as you end up with 1 piece of 12.5" x 24.5" when you're done.)*

- (2) 6.5" x 12.5" pieces
- (1) 12.5" x 12.5" piece

Lining: (2) 12.5" x 12.5" pieces

Cotton Batting or fusible fleece: (1) 12.5" x 24.5" piece *Note: If you're quilting the outside of the bag like I am, you might want to give yourself about 1" of extra batting on all four sides.*

Strap: (1) 2.5" x 8" piece

Zipper: (1) 14" plastic zipper *(If you change the size of your bag from what I'm doing, just make sure your zipper is longer than the bag width and you'll be all set!)*

Assembly Instructions: Watch my video tutorial on how to make [The Squishy Project Bag](https://youtu.be/VbzEAweKAyM) here: <https://youtu.be/VbzEAweKAyM>

Like I mentioned in the video you can make any combination of colors you wish using this same assembly method. I've made a few different colors using scraps I had lying around!

I hope you enjoyed this project! If you make a bag using my tutorial, please tag me so I can see your creations! Use [#squishyprojectbag](#) or tag me [@ericaarndt](#) on Instagram!
